Abenson Ventures Inc.
(2021 - Present)

—

🚀 **Job Description** : Design and implement new or customized page templates for the website UI for projects that are able to communicate the desired value and enhance customer experience.

🔶 **Responsibilities :**
- Design and create wireframe for new page templates and/or projects, ensuring mobile-first design.
- Decide on the dimensions of elements that is proper for both mobile and web view
- Create code and set up the new page templates in staging and live
- Cascade the new page templates to site management team
- Document the new page type/new widgets
- Revamp existing page templates if necessary.
- Implement code automation through tools like Google Sheets and formulas to have reusable codes for widgets and landing pages.

📊 **KPI:**
- 100% on time implementation of page in staging and live (based on target date from Project Team) 100% on time creation of design and wireframe (based on agreed lead time of project team and Site Development Officer)
- 100% on time cascade to site management team (right after setting up the page on live)
- 100% On time cascade (coaching) of project easy ways to related departments
- 100% Completion of training programs assigned (As learner or facilitator)
- 100% Aligned to weekly team updates and reporting
- Deployment of at least 4-6 pages templates per month.
- Implement all design requirements in development
